

A Comprehensive Question List

C# Basics

- 2:15 Latest version of C#
- 2:55 What is the difference between value type and reference type
- 3:46 What is the difference between abstract classes and interfaces
- 4:43 Can we write method body inside an interface?
- 5:16 How will you prevent a class from being inherited by its child classes?
- 5:55 Overloading and Overriding in OOP
- 7:18 Why we use access modifiers; tell about public and private
- 8:11 Protected
- 8:23 Internal
- 8:39 Which part manages memory in CLR automatically?
- 9:16 ⚙ Explain JIT Compiler
- 9:58 What is the difference between managed and unmanaged code?
- 10:27 Is it possible for managed code to access unmanaged code?
- 10:42 Explain the above question
- 11:50 What is the difference between an array and a list?
- 12:57 Reflection in C# (to get type-related info at runtime)

ASP.NET MVC

- 14:00 Have you worked on ASP.NET MVC?
- 14:22 Component/folder name inside MVC
- 15:10 Folder for static files (images/css, etc.)
- 15:48 If I keep static files outside the wwwroot folder, will they be accessible in Razor view?
- 16:22 How to use Partial View in ASP.NET MVC 5; how to call the partial view/any diff in calling in .NET Core and .NET MVC 5?
- 17:28 Four ways to return data from controller to view
- 18:32 Explain Action Filters
- 19:30 Syntax for saving username in a session in ASP.NET MVC and ASP.NET Core
- 20:45 Which type of object do we use to handle a file in the controller in .NET Core?
- 21:22 What is Middleware?
- 22:17 Create Middleware to fetch a specific word from URL
- 23:51 Method name inside Middleware for request pipeline
- 24:47 ✂ How to add output cache at the action method in ASP.NET Core?
- 25:34 RabbitMQ (promotional question)
- 26:36 Unexpected cameo
- 27:04 Dependency Injection in .NET Core
- 28:21 Three ways to register classes in Startup.cs in .NET Core
- 28:45 Action verbs in API
- 29:04 Three parts of JWT
- 29:47 How to handle versioning of API in .NET Core?
- 30:20 Explain Docker
